

In today's economic environment it is more important than ever that companies realize a rapid return on technology investments. Sabrix SAP Express offers rapid integration between the Sabrix Application Suite and SAP applications to ensure customers can immediately benefit from accurate sales and use tax determination, calculation, and reporting. Whether you are engaged in a basic transaction tax management roll-out or undertaking a complex, multi-phase project, Sabrix SAP Express can jump-start your tax transformation initiative. Having completed multiple large-scale integrations for Global 2000 and mid-market companies, Sabrix has the necessary expertise and tools to execute a successful SAP integration with the Sabrix Application Suite in just 5 days.

Fixed-Fee, 5-Day Integration

Sabrix SAP Express combines the SabrixConnection[™] for SAP Basic and SabrixConnection for SAP Goods Movement adapters with deep SAP integration expertise in Sabrix Professional Services to deliver a fixed-fee integration in just one business week. By transferring our global expertise into best practices integration methodologies, tools, and templates, Sabrix is able to streamline key SAP integration tasks to support both order-to-cash and procure-to-pay transactions. Customers implement these best practices and then configure the Sabrix Tax Engine to address their specific business policies and needs.

Best Practices Methodology

Sabrix is committed to providing the highest quality staffing for each integration project. Every team member working on a Sabrix SAP Express project is thoroughly trained in our best practices tools and methodology and is experienced with SAP applications. Each integration team typically consists of one or more experienced staff members including a business systems analyst and a technical consultant.

Each Sabrix SAP Express integration follows a defined process:

- **Kick-off:** Sabrix meets with the customer to review requirements and configuration templates.
- **Installation:** Sabrix installs the Sabrix Application Suite and the SabrixConnection for SAP Basic and SabrixConnection for SAP Goods Movement.
- **Quick Training:** Sabrix delivers basic training to ensure the customer is able to support the integration going forward.
- **Configuration:** Sabrix configures the solution per agreed-upon templates.
- **Validation:** Sabrix demonstrates 6 core transaction scenarios between the Sabrix Application Suite and SAP to validate that the integration is working properly.

- **Acceptance:** The project concludes with customer sign-off that the integration functions as expected.
- **Follow-on:** For companies pursuing a more complex, multi-phase tax transformation project, the Sabrix integration team will engage in follow-on discussions to begin next phase project implementation.

Sabrix Installation Requirements

The following installation and configuration requirements apply for all Sabrix SAP Express integrations:

Sabrix Tax Engine:

- Sabrix 4.3.3.6 or higher on supported platforms with US and Canadian Content
- Basic configuration of the Sabrix Tax Engine is supported including setup of one Sabrix company with US and Canadian nexus and all transactions taxable.

SabrixConnection for SAP

- SAP R/3 4.6 or higher
- SabrixConnection for SAP Basic 1.1.2.4 or higher
- SabrixConnection for SAP Goods Movement 1.0.0.1 or higher

Satisfaction, Guaranteed

At Sabrix, we measure our success by the success of our customers. We don't consider the Sabrix SAP Express project complete until we have demonstrated the following 6 core transactions across the order-to-cash and procure-to-pay business processes.

Sales (SD)

- Process a sales document
- Process a billing document

Purchase (MM)

- Process a purchase document (self assessed & vendor assessed)
- Showcase a logistics invoice verification

Finance (FI)

- Process a miscellaneous vendor invoice (self assessed & vendor assessed)
- Process a miscellaneous customer invoice

Post integration, Sabrix's highly trained support staff is committed to providing timely resolution of all customer support requests. Various levels of Sabrix global customer support programs are available as well as Sabrix documentation, and other content essential to Sabrix integrations.
