

SABRIX MANAGED TAX SERVICE INTEGRATION WITH ORACLE

Sabrix Managed Tax Service seamlessly integrates with Oracle to provide the highest level of compliance while eliminating manual, error-prone processes.

Now from within your Oracle Receivables/Order Management (AR/OM) application you have access to real-time sales and use tax rates and calculations and the peace of mind that comes with SAS 70 Type II certified tax research and the support of account management from tax experts. Read below to learn about the integration highlights, benefits and how your Oracle application will be enhanced.

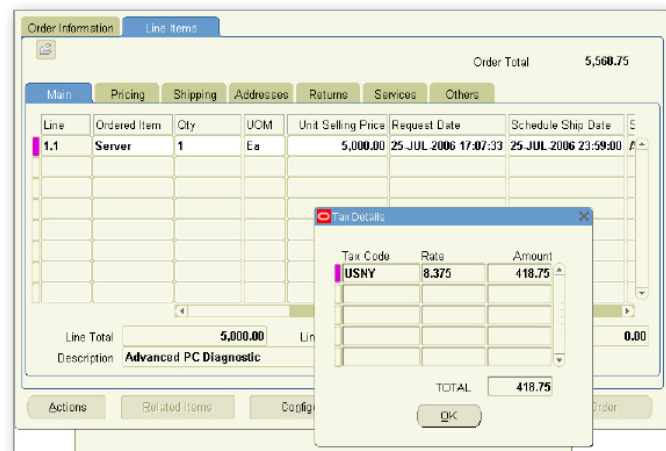

HIGHLIGHTS OF THE ORACLE INTEGRATION WITH SABRIX MTS:

Get simplified set-up, support for key transactions, and ease of use.

- **Set-Up:** Sabrix Integration with Oracle E-Business Suite is an Oracle Validated Integration, guaranteeing simplicity and a seamless integration.
- **Sabrix Tax Area Code:** The established tax schedule makes calls out to the Sabrix engine, eliminating the need to update multiple tax schedules for sales and use every time there is a rate or rule change.
- **Supporting Key Transactions:** The integration supports quote to cash business processes, including standard orders, mixed use orders, bill of materials, sales side credits, invoicing, adjustments, and more.
- **Ease of Use:** Users can be up and running with no training required and no changes to the Oracle interface or your business processes.

“Sabrix has the tax expertise and technology to manage our tax compliance so we can focus on building our business.”

-Mike Akers
CFO
Power Systems Inc

Oracle's sales order with Sabrix real-time tax determination.

BENEFITS OF THE INTEGRATION WITH SABRIX MTS:

- **Easy Set Up:** The seamless integration does not require additional IT resources nor change the Oracle user interface as MTS runs behind the scenes, providing instant benefits to users.
- **Higher Degree of Compliance & Accuracy:** Rely on the same SAS 70 Type II compliant Tax Research Team as our Global 2000 customers from within your Oracle account. Be assured every transaction has the accurate sales & use tax calculation and achieve a higher degree of compliance.
- **Eliminate the Tax Expertise Required to Use Oracle Functionality:** Using the tax functionality inherent in Oracle currently requires a tax expert that can interpret tax rules and product taxability when processing orders. Our integration automates these decisions to provide a higher degree of accuracy and free up your time.
- **Reduce Manual Processes & Wasted Time:** Order Management and Receivables clerks never have to select the right tax rates or tax schedules and you no longer need to maintain multiple tax schedules for sales and use tax on a monthly basis.

KEY ENHANCEMENTS YOU WILL REALIZE FROM THE INTEGRATION:

- Eliminating the need to purchase, update and maintain tax rates for 13,253 tax authorities.
- Provides detailed audit trails with date stamps and version tax rates for consistency and historical integrity.
- SAS 70 Type II Tax Research means expanded product categories for more refined taxability.
- More sophisticated tracking of "ship to" addresses accounts for headquarters and actual shipping addresses.
- Supports Tier Taxes.
- Detailed audit reports including GL reconciliation, period closing summary and detail, period closing by authority and returns calendar.
- Automatically prepares and delivers signature-ready returns and remittance managed by our team of tax experts.
